🖥 OBJECTIVE

Hi, I am Mukul Kral
To answer this, I would like to start with my conduct in persuing a job role, which is sheer dedication in order to add some value in the organisation I would work through creativity and innovation. I see my workplace as my home. As we give our level best to build our home, it is the same for me wherever I put my efforts.

IET (Alwar)/Bikaner Technical University (BTU) Bachelor of Technology (B.Tech) cgpa: 9.1	2023

📁 PROJECTS

E-commerce website

This is an e-commerce website created by me. Which is created by using front-end Technologies(HTML, CSS, JS)in which user/consumer has variety of option to choose in order to purchase clothes.
It is a complete web application containing all the suitable web pages.

IMDB web application

This is the sample clone of official IMDB website which is created by using (React , React-router , TMDB Api).
It gives complete information about upcoming/trending movies under different genres.
This web application has the user to get redirected to the official movie page.

Weather application

This application is created using React and open weather Api.
It gives complete information about current weather of different cities.
In this application we are getting information like(current temperature , Weather , humidity ,wind speed, etc.)

Spotify music application

This application is created using React and spotify Api.
Which has different music cards through which we can play our favourite songs.
